## EDUCATION

### Bachelors of Computer Science SEECS, NUST

09/2019 - 06/2023

Islamabad

## PROJECTS/WORK

#### Service Provider Application - FYP

- Contributed as a frontend and backend developer
- Built figma prototype, Achieved flutter developer skills
- Built backend in NodeJS, MongoDB database
- Hosted mobile and web app

#### Personal Portfolio v1.0

- My personal portfolio website, built from scratch which features some of my projects, future learning, resume and technical skills
- Worked on ReactJS, EmailJS, Bootstrap v5, Lottiefiles, Mobile First Work flow, and Adobe Illustrator

#### REST Countries API

- In this project, I've integrated REST Countries API with react website to pull country data and display it
- Built with ReactJS, Bootstrap, Custom CSS3, Mobile First workflow

#### Cloud Storage with S3

- In this app, I was able to store user's data directly to AWS S3 that reduced server's load
- Built with Node, HTML5, CSS3, ExpressJS

#### Space Tourism Website

- I've implemented this multi page tourism website with React, Router, Hooks, CSS3
- Successfully converted Figma Design to actual react website

#### JavaScript Advice Generator

- In this JavaScript app, I've successfully generated advices from advice slip API
- Built with JS Fetch API, HTML5, CSS3

#### Fylo Landing Page - Bootstrap

- A landing page with two column layout, Responsive Design, and hover states for all interactive elements on the page
- Built with HTML5 and Bootstrap v5.0 with custom CSS properties

#### Prototyping/Wireframing - Figma

- Low and high fidelity prototyping of productivity challenger web app.

#### Emma Book Store - Java, Apache NetBeans

- Consist of a graphical user interface and allows user to search and purchase books, get printouts of the receipts

#### Voting Management System - sqlite3, python, MySQL.

- Software provides an easily accessible method of voting to all the eligible voters in Pakistan
